MANUFACTURING CAPABILITIES

AGT Gaskets offers a complete range of converting capabilities to meet your specific requirements. With advanced equipment and in-house expertise, we provide flexible solutions from prototypes to high-volume production.

- Rotary Die Cutting
- Flat Bed Die Cutting
- Laser Cutting
- Water-Jet Cutting
- Digital Plotter Cutting
- Precision Slitting
- Laminating
- Adhesive Converting
- Multi-Layer Constructions
- Assembly
- Screen Printing
- Kitting & Packaging
- Engineering Support
- Rapid Prototyping
- Short & Long Production Runs
- In-House Tooling Support

MATERIALS

Our material experts help you select the best material for your application. We have access to thousands of thin, flexible materials ranging from foams and rubbers to films, adhesives and foils.

- Foams (PU, PE, EVA, etc.)
- Rubbers (EPDM, Neoprene, Silicone, NBR, etc.)
- Adhesive Tapes & PSA
- Thermal Pads
- Graphite
- Conductive Materials
- Films & Polyester
- PTFE (Teflon®)
- Cork
- Non-Wovens
- Metal Foils (Copper, Aluminum)
- Custom Laminations

CUSTOM GASKET SOLUTIONS

From gaskets and seals to insulation, shielding, cushioning and more, AGT Gaskets provides precision die-cut components that solve real-world challenges.

Gaskets & Seals

Bonding & Joining

Thermal Management

Filtering & Venting

Electrical Insulation
